Android Developers

Our branch in Greece is looking for a highly motivated Android Developers to help in the development of our next generation mobile app. They will work closely with experienced product owners, software engineers, and QA engineers to ensure sprint goals are met and that the shipped product is of high quality.

Friendly, collaborative and social team environment.

ESSENTIAL EXPERIENCE / REQUIREMENTS:

- Proficient in developing Android applications in Java, knowledge of the Android Platform, SDK, Android Studio
- Proven experience with outside data sources and APIs (JSON, REST, XML)
- Good understanding of the Agile principles
- Proven experience in developing engaging Native Android applications across different devices and stores
- Experience across the entire software development life-cycle from inception, through build to production - has lived with the impact of software and system design decisions on manageability, supportability, and troubleshooting.
- Fluency in Greek and English (spoken and written)

DESIRABLE EXPERIENCE:

- Degree in Computer Science or relevant experience commensurate to a bachelor's
- Kotlin experience or an interest in learning
- Familiar with GIT or have a Github / Bitbucket account where you publish libraries, open-source apps or contribute to other projects

RESPONSIBILITIES:

- Developing and extending the reach of a highly-rated existing applications
- Developing and producing functional solutions
- Building prototypes at tech scoping stage of projects
- Designing and implementing reusable components to connect to the set of APIs
- Writing modular, well-tested code that remains easy to maintain as the codebase and business continues to scale

Aisle Ahead

106A W. SUMMIT HILL DRIVE - KNOXVILLE, TN 37902 - 865.524.8888

- Ensure that software is built in a way which is consistent with - and exploits where possible - the collective frameworks, patterns, and practices that exist across the wider Engineering community.
- Understand and apply industry best practices, foster knowledge sharing to provide solutions for complex business problems where no precedent may exist, and ensure implementation of solutions where appropriate.
- Mentor and develop more junior Mobile engineers, providing clear and constructive feedback and creating opportunities for learning and growth.

BENEFITS:

The company offers an attractive remuneration package and a stable working environment for an extensive professional growth.
