iOS Developers

iOS developers with a range of experience (Junior, Mid-level and Senior) are required by our branch in Greece in order to build and maintain applications for the iOS platform.

As an iOS Developer, you'll take ownership of working across the full development life cycle, liaising with senior stakeholders to design and develop new features and enhancements to our market-leading apps. You will be working within the rest of the development team to define, design and deliver new features and identify / correct bottlenecks and fix bugs along the way.

Friendly, collaborative and social team environment.

ESSENTIAL EXPERIENCE / REQUIREMENTS:

- 3-6 years experience as an iOS Developer
- Experience building interfaces using auto layout
- Proficient with Swift
- Familiar with RESTful APIs
- Strong understanding of configuration management tools as well as automation and build frameworks (eg GIT/Gerrit, Gradle, CI/CD etc.).
- Collaborative team member with strong communication skills
- Exposure to modern Mobile development technologies, frameworks & patterns.
- Experience across the entire software development life-cycle from inception, through build to production - has lived with the impact of software and system design decisions on manageability, supportability, and troubleshooting.
- Fluency in Greek and English (spoken and written)

DESIRABLE EXPERIENCE:

- Degree in Computer Science or relevant experience commensurate to a bachelor's
- Familiar with GIT or have a Github / Bitbucket account where you publish libraries, open-source apps or contribute to other projects
- UI and UX design experience

RESPONSIBILITIES:

- Developing and extending the reach of a highly-rated existing applications
- Developing and producing functional solutions

Aisle Ahead

106A W. SUMMIT HILL DRIVE - KNOXVILLE, TN 37902 - 865.524.8888

- Building prototypes at tech scoping stage of projects
- Designing and implementing reusable components to connect to the set of APIs
- Writing modular, well-tested code that remains easy to maintain as the codebase and business continues to scale
- Ensure that software is built in a way which is consistent with - and exploits where possible - the collective frameworks, patterns, and practices that exist across the wider Engineering community.
- Understand and apply industry best practices, foster knowledge sharing to provide solutions for complex business problems where no precedent may exist, and ensure implementation of solutions where appropriate.
- Mentor and develop more junior Mobile engineers, providing clear and constructive feedback and creating opportunities for learning and growth.

BENEFITS:

The company offers an attractive remuneration package and a stable working environment for an extensive professional growth.
